The Sims Medieval updates to version 2.0 thanks to the new patch released by EA. Here's the list of the new functions:

- New Feature: Move Out Children – Send children on adventures to make room for more children in your household.
- New Feature: Un-Furnished Buildings – Can choose between furnished and un-furnished lots when placing a Hero Sim's building in your kingdom.
- New Feature: Create-A-Sim Makeup.
- New Feature: Children's clothing can be changed in CAS.
- New Object: Chess Table.
- Bug Fix: CAS Performance – It takes several minutes to load the thumbnails from the "View Sims" folder in CAS.

Thanks [SimPrograms](#) , [Sims Slovenia](#) and [Sims Galore](#) for the find!
