It's available for download the **patch 1.2** of **The Sims Medieval**, that addresses the majority of the stability issues experienced by some users.

Attention!! When you install the patch you will lose quest progression! So, we suggest you to complete your active quest and then install the patch.

With this patch you bring your game to 1.2 version. If you are still experiencing stability problems or crashes please follow the instructions on the official forum ([HERE >>](#)).

Details about patch on [official forum](#) .
